

Manage Airbnb Photos

The 'Manage Photos' section allows you to upload existing room type images from with MyPMS. The library of room type images will display in this section and you can pick and choose which images you wish to publish to your profile. To update Room Type images within MyPMS, please reference MyPMS Room Type Images [here](#)..

By simply checking the box of each image, the images that are checked will be published to Airbnb by clicking the 'Update' button.

We recommend giving the system at least 30-60 seconds to confirm these images have been sent. If there are any issues with your images, we will display the details post upload.

Note: Airbnb does require a minimum of seven photos. There needs to be at least three that are high quality, which Airbnb defines as 800 pixels in width and 500 pixels in height. Please contact BookingCenter support if you need assistance with images.
