MyCard EMV

MyCard EMV© is BookingCenter's credit card payment gateway for EMV terminals that is tightly integrated with MyPMS©. It is intended to be transparent to the user and eliminates the need for separate POS, additional phone lines, monthly and transaction fees as well as the time intensive auditing of settlement reports against MyPMS audit reports.

Managing Credit Card Transactions with MyCard EMV©

When setup with **MyCard EMV**©, when you add a credit card from the New Booking window, the Booking Data tab, or the Manage Credit Cards screen, an option to 'Swipe/Dip' is presented **in addition to** the Manual Transaction/Swipe' method used in **Traditional MyCard**©. The 'Swipe/Dip' option awaits input from the EMV device and enters the authorization with an (E) that shows the transaction was a 'dip' or 'tap' from an EMV device. See the following functions below for specific tasks.
