

Entering your System Labels

The Labels you initially see in the window are the system defaults. The terminology you enter here will be used throughout the program and online. For example, if you type 'Cottage' for the Rooms system label then theBookings button on the Home window will read 'Cottage Bookings' instead of 'Room Bookings' and so forth. This allows you to tailor the system to the terminology used by your establishment. Please take note that the system label defaults are used throughout this manual.

1. Choose Parameters from the BookingCenter menu or ? + U to display the Parameters window.
2. Click on the System Configuration button to display the System Configuration window.
3. Click on the Labels button to display the System Labels window.

The screenshot shows a window titled "System Labels" with a toolbar containing an "Edit" button and a help icon. Below the toolbar is a table with two columns: "Singular" and "Plural". The table contains the following rows:

Singular	Plural
Personnel Person	Personnel
Owners Owner	Owners
