

Booking Engine

The BookingCenter Booking Engine is an online booking engine that can be hosted and connected to any website, as it's built on our available API and XML Web Services. See details on the supported APIs [here](#) and what a customer can do to receive the code to customize it further for a customer's needs.

The booking engine can be easily customized by adding media elements such as logo, banner, marketing policies, reviews, and room type images. All bookings made on the booking engine are automatically imported into your PMS with booking and payment details. All Rate and Package restrictions are enforced, allowing a property to use their website as their dominate booking channel.
