

Self Check-in | Check-in Process

The Self Check-in system is completely automated from start to finish and includes automatic messaging, payment authorization, eSign – digital signing (optional) and room specific information allowing detailed instructions for a mix of hotel and rental units. The process is tightly integrated with MyPMS for “real-time” booking and status updates. This means that when a Guest updates Booking Details and Payment Method, then this information will automatically update in MyPMS. Conversely, certain criteria must be met in MyPMS for a Guest the "Check-in" button to appear and allow the guest to check-in. If the criteria is not met, then a message will display directing the Guest on what action to take to complete check-in. See [Self Check-in | Booking Criteria](#)

Once the Self Check-in function is enabled for your site, then each Guest will [automatically receive the "Self Check-in Start" Letter](#) set in [Default Letters on Booking Arrival Date](#). This Letter is customized by you in [SETUP | LETTERS](#) and must be selected as the "Self Check-in Start" Letters in Default Letters. If you do not want the "Self Check-in Start" Letter to be sent to a specific booking, then you have the ability to "Exclude Guest from Self Check-in" in the Booking Information.

After the Guest receives the "Self Check-in Start" Letter and clicks on the link to access the secure guest portal, they will be able to update booking details and payment method and check-in if they click on the Arrival Date. The "Self Check-in" button will not display until the Arrival Date and Arrival Time of the booking.

SELF CHECK-IN PROCESS

STEP 1: Start Self Check-in: Send a "Self Check-in" Letter to Guest

The Self Check-in function is enabled for each booking in MyPMS (unless it has the flag; ["Self Check-in Exempt"](#) selected) and is seamlessly integrated with Letters. The Self Check-in process is started by sending a customized letter via email and/or SMS to the Guest on or before the check-in date.

This Letter is called the **"Self Check-in Start" Letter** and starts the Self Check-in process by automatically sending an email and/or SMS to the Guest with the secure link to access MyBooking at a scheduled time **before** check-in or **on check-in date** using the "Auto Letter" function. There are three ways this Letter can be sent to the Guest.

1. Automatically sent to Every Guest ON Arrival Date at the hour **set by you** in [General Settings](#), which *by default* will be 7:30 am, but can be at **any time you desire**:
 - a. for **emails**, the system defaults to 7:30 am on the day of arrival, in your property time zone.
 - b. for **SMS**, the system defaults to sending at 7:30 am on the day of arrival, in your property time zone.
Remember, an email won't disturb anyone's sleep, but an earlier SMS Message might be rude.

For same day bookings, since your 'default time' for emails and/or SMS may have passed, a 'same day booking' Letter is always sent **as soon as the booking has been processed** for both email and SMS. You need to select this Letter and the method delivery (email and/or SMS) in Default Letters. For instructions, go to [Self Check-in | Default Letters](#).
2. Automatically BEFORE Arrival Date using [Auto Letters](#). Use this function if you want the Self Check-in Letter sent more than once. For example, 2 days before check-in.
3. Manually from the Letters Tab of each booking.

STEP 2: Guest Updates Details or Checks-in Depending on Date of Login

Once the Guest clicks the secure link sent in the "Self Check-in Start" Letter and enters the MyBooking Guest Portal, they will see their booking details and/or be able to check-in depending on date of login.

Date and Time of Login

- If the Guest logs in BEFORE the Check-in date, then the guest will only be able to manage Booking Details, perform their eSign (if required) and update their payment method and guest information. The "Check-in" button will not display and a message will show to come back for Self Checkin on their arrival date.
- If the Guest logs in ON the check-in date the "check-in" button will display if all criteria is met in MyPMS, see [Self Check-in | Booking Criteria](#). If the criteria has not been met, then a message will display to the Guest with the action that needs to be taken.

Number of Rooms Booked

- If the Guest has only one room booked, then only the booking details will display for that particular booking.
- If the Guest has a multi-room booking, then ALL of the bookings under that Guest Name for check-in that day will display. The Guest can click on each booking to view and update details, as some bookings may have different arrival times than others, thus they won't be necessity all have the same rules for Self Check-in.

STEP 3: Check-in Complete - Send Guest Room Entry Instructions

After the Booking has met all Booking Criteria and the Guest clicks the Check-in button, the booking is automatically checked in to MyPMS and the Room Entry Instructions will display on in MyBooking, an email will be sent to the Guest and/or an SMS Message and if you have MyGuest enabled, a notification will be sent to you.

In order for this information to be automatically emailed and/or SMS to the guest, you must enter the information in the "Room Notes" of each Room. Then, insert the merge field the "Self Check-in Complete" Letter. This Letter can be created by you or you can edit the Default Template provided.

After this letter is created, it must be set up as an Auto Letter function to be automatically emailed to the Guest on the check-in date. or sent manually in the Letters Tab of the Booking. For instructions, go to [Self Check-in | Default Letters](#)
